A passionate and dedicated final-year BSc-IT student with a solid foundation in Java and PHP. I enjoy exploring new technologies and applying my knowledge to real-world projects. Over the course of my studies, I've built several applications and websites, including a Gym Management System, College Website, and a Hostel Management System. I also have hands-on experience with smaller class projects like Login Pages, Admin Panels, Calculators, and User Dashboards. My goal is to continuously grow and apply my skills to contribute effectively to the IT field.

10TH

St. Ignatius School Gayatri Path
Aurangabad Bihar
